The Downs Speedway club was originally established in 1966-67 when racing was held at the old Toowoomba Showgrounds and continued there until 1974 when the Royal Agricultural Society announced they would promote speedway themselves. The then members of the club voted to establish their own grounds and in May 1975 the land at Charlton was purchased and many hard-working dedicated people spent a lot of hours working to establish this great complex that we enjoy today. The Down Speedway Club's Charlton Raceway complex was opened on 23 April 1977.

The club ran and operated the venue successfully until the 2013/14 season when become privately promoted by Alan Woods who operated the venue for two seasons until he sold the lease to Made Too Go Pty Ltd (Barry Waldron) in 2015 for the 2015/16 season.

# SPEEDCAR SCENE

Written by Barry Lane

The Heritage Speedcar Series continues tonight with our feature race to honour Bob Baker. Baker was a racer from the 1960s driving an uncaged speedcar at the very daunting Sydney Showground. He only raced for a few years and eventually moved to North Queensland where he operated a very successful dive business. After retiring he moved to the Sunshine Coast where he renewed his interest in speedway travelling to Brisbane and other South-East Queensland venues. He implemented a cash giveaway for the speedcars which continues today thanks to his widow, Nancy. Bob passed away in 2023 at the age of 79.

For those of you who were here on December 27, you witnessed a frightening accident involving Bailey Leeson and Cody O'Connell, when the cars rolled heavily into turn 3. Both drivers were badly shaken, and Bailey suffered a concussion, but by the time you read this they should both be well on the way to a full recovery. Both cars were severely damaged, and Bailey will be on the sidelines for a time as the team builds a new car.

One driver absent tonight is Harry Stewart who is now in Tulsa Oklahoma preparing to compete in the Chili Bowl Midget Nationals. An indoor event that attracts over 370 entrants. He will put the experience he gained last year to good use in 2026.

Some fans in the stands may not be aware of the technology of a speedcar. The cars are built using aircraft quality round tubing with the wheelbase being around 72" (183 cm) and sitting on 13" (33 cm) wheels. Purpose built race engines have a maximum capacity of 166 cubic inches while a production car engine can go to 180 cubic inches. Most teams use a programmable ignition system which can easily be 'tweaked' for varying conditions. Methanol fuel is used, which helps cool the engine as there is no fan. A good engine will develop 370-380 bhp. Drive is direct from the back of the engine to the quick-change rear end which necessitates a push start as they have no clutch or starter. Cars are fitted with a power steering unit and the brakes are disc, with one mounted on the rear axle and the other on the front left wheel. Overall weight, with driver, is a minimum of 476 kg (1050 lbs).

Enjoy your night at the skids.
